LEVIE ANDREW CRUZ LAMEYRA

San Pedro, Laguna | +63 965 075 8053 | levielameyra@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented **AI Data Annotator** with hands-on experience in project-based, remote multimodal data annotation (text, image, audio, and video) and quality assurance. Proven ability to perform accurate and consistent data labeling, validate peer-annotated datasets against complex guidelines, and provide actionable workflow feedback to improve overall project quality. Recognized for high accuracy, meeting strict Average Handling Time (AHT) and productivity deadlines, and strong English comprehension. Bachelor's degree graduate available to start immediately for full-time, project-based engagements.

CORE SKILLS

- **Data Annotation & QA:** Multimodal Data Annotation (Text, Image, Audio, Video), Taxonomy-Based Video Metadata Annotation, Action Cutting Segmentation & QA, Data Validation & Peer QA Review, AI/LLM Response Evaluation & Ranking, Hallucination & Grounding Verification
- **Quality & Process Improvement:** Guideline & Rubric Compliance, Workflow Documentation, Pattern Extraction, Root-Cause & Accuracy Auditing, ISO 9001:2015 Quality Standards
- **Tools & Remote Collaboration:** Multimango, Google Workspace (Sheets, Docs), Microsoft Office, Microsoft Teams, Zoho Mail, Ticketing & Case Documentation Systems

PROFESSIONAL EXPERIENCE

AI Data Annotator (Project-Based, Remote) | Frodobots *(July 2026 – September 2026)*

- **Video Metadata Annotation:** Watched video segments and populated detailed metadata following a structured project taxonomy—categorizing the environment, venue, scene, task category, task, specific action, dexterity, physical change, and lighting.
- **Action Cutting Segmentation:** Reviewed raw video files and accurately cut them into distinct, usable action segments in strict adherence to annotation guidelines to prepare datasets for metadata tagging.
- **Cutting Segmentation QA:** Audited and validated cut video segments completed by other annotators to ensure accurate action boundaries, completeness, and strict compliance with project guidelines.
- **Remote Productivity & Quality:** Consistently met daily productivity quotas, accuracy standards, and project deadlines while working independently in a full-time remote environment.

Analyst – AI/LLM Practice (Project-Based, Remote) | Innodata *(March 2026 – May 2026)*

- Executed multimodal AI data annotation and evaluation across text, image, audio, and video content based on detailed project rubrics and quality standards.
- Selected for priority shadowing in recognition of top-tier performance, providing feedback and documenting effective annotation workflows and best practices to improve overall team quality.
- Reviewed, compared, ranked, and improved AI-generated responses while performing grounding verification, pattern extraction, and image/video quality comparisons.
- Identified AI hallucinations, misinformation, and logical inconsistencies to ensure high dataset integrity.
- Maintained strict productivity targets, Average Handling Time (AHT), and QA accuracy standards while working independently in a remote team environment.
- Utilized Multimango for annotation workflows, Google Sheets for monitoring productivity hours, and Google Workspace, Zoho Mail, and Microsoft Teams for team communication, training, and task coordination.

Technical Specialist | Access Gov Solutions Inc. *(July 2023 – November 2025)*

- Conducted detailed online and market research, data entry, and technical documentation to support complex government bidding proposals.
- Installed and configured multiparameter water quality monitoring sensors and remote weather stations, ensuring accurate environmental data collection and system reliability.
- Prepared comprehensive operations and troubleshooting manuals, field activity reports, and post-project documentation with high attention to detail.

Customer Support Representative | Concentrix *(November 2022 – December 2022)*

- Accurately documented customer interactions, technical diagnostics, and case resolutions in the tracking system while maintaining clear, professional English communication.
- Provided step-by-step technical troubleshooting for 5G network, modem, and router configurations while meeting resolution and quality metrics.

EDUCATION

Bachelor of Engineering Technology (Non-Destructive Testing) — *4-Year Degree*
Technological University of the Philippines – Taguig | *Graduated 2023*

CERTIFICATIONS & TRAINING

- ---

  AI Skills and Management for Virtual Assistants – Udemy (2026)
- **Social Media Certified** – HubSpot Academy (2026)

- **Cybersecurity Training** – IADALE Learning Center (2024)
- **ISO 9001:2015 (Quality Management) & ISO 31000:2018 Trainings** – Certification Partner Global (2023)
- **Search Engine Optimization (SEO) Online Course** – ProVA (2023)
